Accenture HR Productivity Suite— designed for mySAP™ ERP HCM

The work of an SAP system applications manager is complex, but there are common problems and challenges that are faced across all organizations in managing mySAP ERP Human Capital Management (HCM).

"Analyzing SAP HR data content can be difficult; it demands a lot of effort and expertise."

For example—when copying data from your SAP live system to your productive system to analyze and solve a payroll issue, you really only need a relatively small amount of data. Unfortunately, to do this, you have to copy the whole client. Would it help if you could select only the required data?

"Migrating to a new SAP release can be time-consuming."

Or, when applying SAP's frequent updates, you need to identify the potential impact on your system. Would it help you if you had a tool that would document changes automatically?

"I need useful data for testing."

Today, HR and IT departments alike are challenged with improving service quality, while at the same time reducing costs and conserving administrative resources. To support clients in meeting these challenges and help them increase operational effectiveness, we have developed the Accenture HR Productivity Suite.

"I have no practical way of analyzing patches in an economical way."

The Accenture HR Productivity Suite is an innovative software application that was developed to improve performance and functionality and maximize the potential of your mySAP ERP HCM solution, allowing you to seamlessly track and harmonize your processes, increase security, and reduce costs.

"It's hard to verify the integrity of my own data."

The three main components of the Accenture HR Productivity Suite—Accenture Clone and Test, Patch Analyzer and the Audit and Compliance Tool—simplify SAP system management and help reduce the total cost of ownership (TCO).

The Accenture HR Productivity Suite optimizes your mySAP ERP HCM system and will:

Make it faster

Reduce SAP patch adoption time by half. Use our comparison tools to detect changes both before and after upgrades and patches, and shorten payroll release times dramatically through automated rule verification.

Make it more cost effective

Free up resources and reduce upgrade times by using our automatic coding generator rather than manual checking.

Make it more analytical

Extend payroll analysis to provide comprehensive insight into payroll and master data. Compare differences between systems, even for different SAP releases, and simplify information queries without the need for programming.

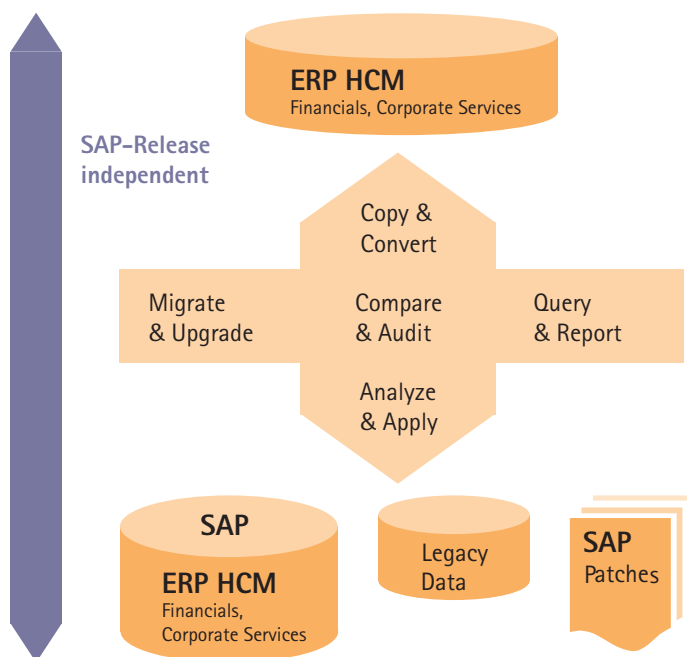

Make it safer

Use the suite to guarantee the integrity of your HR data and system security with continuous auditing, and run extensive comparisons and checks on current data.

The Accenture HR Productivity Suite will allow you to open up new opportunities and maximize your investment in your mySAP ERP HCM system.

Accenture Human Capital Management Solutions brings together experts in mySAP ERP HCM technology, strategy, and implementation.

Accenture HR Productivity Suite for mySAP ERP HCM

We help clients to reduce HR costs, improve the delivery of HR strategy and management, and enhance employee satisfaction.

Whether it's process definition and design, technology consulting, solution development or implementation, Accenture's unrivalled knowledge in all areas of mySAP ERP HCM enables us to optimize and customize the solution for maximum business benefit. By applying leading practices in process optimization and organizational design, costs are reduced and resource utilization is improved.

As a leading European "SAP Service Partner", Accenture Human Capital Management Solutions provides specialized mySAP ERP HCM skills—with delivery of more than 1,000 implementations worldwide.

Over 850 customers in more than 40 countries believe in using Accenture Human Capital Management software to maximize their investment in their existing mySAP ERP HCM system.

Even SAP uses Accenture proprietary software! We can have no better recommendation.

Support

Accenture HR Productivity Suite is supported by skilled professionals from Accenture Human Capital Management Solutions with expertise in business and technology and a dedicated support desk (hcmproductsupport@accenture.com) to help you resolve problems and answer your questions.

Availability

Accenture HR Productivity Suite is available as of mySAP Release 4.6c in both English and German. Please contact us directly for information regarding the additional languages available at hcmsoftwaresales@accenture.com.

"SAP regards Accenture Clone and Test as a helpful tool to enable SAP customers to complete tasks associated with mySAP HR upgrades and various types of mySAP ERP HCM implementation projects."

Uwe Simon, Vice President
HCM Localization, SAP AG

About Accenture Human Capital Management Solutions

Accenture Human Capital Management Solutions, part of Accenture's Human Performance group, comprises deeply skilled professionals who specialize in SAP Human Capital Management (HCM) technology, strategy, and implementation. With approximately 600 SAP HCM experts globally, Accenture Human Capital Management Solutions is one of the largest and most experienced global providers of human capital management services and solutions. The organization provides deep expertise and delivers proven results in leveraging SAP HCM technology to drive higher levels of HR performance for clients. Completing the portfolio is a proprietary suite of software that increases functionality and productivity, improves quality, and reduces timelines for implementing and realizing value from the leading SAP HCM technology platform.

As part of a global network of more than 7,000 Human Performance professionals and more than 17,000 consultants skilled in SAP, Accenture Human Capital Management Solutions is uniquely capable of delivering global, complex, SAP HCM-enabled HR transformation initiatives to help our clients achieve high performance.
